

Matthew Moore

303-731-6898 / xybermatthew@gmail.com / xybermatthew.com

- OVERVIEW:** Passionate web professional, that dreams in markup, seeks opportunity to slap uncooperative browsers into shape with a paperclip, some dental floss, and a well-placed "position: relative." But wait, this professional steps back and starts to think "Now, how can I make this better or more interactive?"
- EXPERIENCE:** **UI Developer, Fox Interactive Media — Photobucket; Denver, CO — 2008-2009**
Responsible for developing and integrating sponsorship opportunities into the company's top-tier web application, at 12.5 million unique visitors per day, using optimized/cross-platform XHTML/CSS, DOM Scripting, Ajax, Prototype, PHP, Smarty, and MySQL.
- UI Engineer, Local Matters, Inc.; Denver, CO — 2008-2008**
Using XHTML, CSS, YUI, and JSP, client specifications were implemented into high-traffic local search products with a team of 12-15 developers in agile two-week iterative development cycles. Daily tasks consisted of working closely with other departments, on multiple projects, to meet aggressive schedules.
- Product Manager/Technical Web Producer, Arrow Electronics; Englewood, CO — 2006-2008**
Strategically planned and developed essential global websites in a highly team-oriented setting using web standards for a Fortune 500 company. Sites were programmed with JSTL, custom JavaScript and jQuery, Ajax, and JSON data from a proprietary back-end environment of Java and Oracle.
- Web Consultant/Project Manager, Freelance; Littleton, CO — 2006-2008**
Performed a full spectrum of web-related tasks including project planning, wire-framing, web design direction and optimization, server-side programming using PHP and MySQL, JavaScript interactivity, standards compliant XHTML and CSS, browser testing and SEO optimization.
- Webmaster/IT Manager, Academic Impressions; Denver, CO — 2005-2006**
Responsible for maintaining the company's website and its sister company's website consisting of XHTML, CSS, PHP, and image optimization. Provided management and support for all servers, desktop computers, software, and network infrastructure.
- Webmaster/IT Manager, WellSpring Financial; Broomfield, CO — 2001-2004**
Created and maintained the company's website using standards-compliant, efficient and optimized XHTML, CSS, PHP, and MySQL. Executed the setup and administration of a network and central server with database for the company's client management system.
- UI Engineer, Ascential Software; Denver, CO — 2000-2001**
Engineered the look and feel of the company's most prominent web-based application: a proprietary back-end environment using Java and XML, for meta-data searching. Implemented the front-end using custom graphics, valid XHTML and CSS.
- Web Designer & Integration Engineer, MapQuest; Denver, CO — 1998-2000**
Created and updated web page templates along with optimized graphics for the client-based products, as well as the layout and interface design of Intranet-based sales tools. Integral in research of new web methodologies and overall "look and feel."
- SKILLS:** Valid Hand-coded XHTML and CSS, Unobtrusive JavaScript, JavaScript Libraries (jQuery, YUI, Prototype), Ajax, JSON, XML & Website Optimization. General experience with Subversion, Linux, Apache, MySQL, PostgreSQL, PHP, Perl, JSP, JSTL, Smarty, SEO, & SEM. Working knowledge of MVC and OO methodology.
- EDUCATION:** **Strayer University, Arlington, Virginia (online) — Inter-networking Technologies**
Arapahoe Community College, Littleton, Colorado — Computer Information Systems
Colorado Mountain College, Glenwood Springs, Colorado — Graphic Design
